

PRIVACY POLICY

EXPO R&M

Date of the latest update: May 1, 2020

We don't ask for any information that may disclose your identity. We don't share your information with third parties except to deliver our Products, protect our rights, or effectuate a business transfer.

By using, accessing, or attempting to access our Products, visiting our website, you agree to the use, disclosure, and procedures outlined in this Privacy Policy.

1. Data Collection

- **Service Usage Info**

We log technical information about your use of the Products, including the type of browser and version you use, the account identifier, the last access time of your account, the Internet Protocol (IP) address used to create the account and the most recent IP address used to access the fices. Also we collect information about the device you use to access your account, including the hardware model, operating system and version, and unique device identifiers, but this information is anonymized and not tied to any particular person.

- **Authorization & Verification Info**

When creating an Account, your email address and password will be encrypted and stored for further access to Products.

- **Transaction Information**

For all personal and enterprise user accounts, we collect transaction information including deposit snapshots, account balances, trade history, withdrawals, order

activity and distribution history. This transaction data is monitored for suspicious trading activity for user fraud protection, and legal case resolution.

2. Data Usage

We will use this information only for this purposes:

- Management of our business;
- Build a bond with clients;
- Development and enhancement of our Products;
- Address user requests;
- Investigate fraudulent actions;

We will process your Personal Data legally and fairly and not use it outside the purposes of which we have informed you, including selling it individually or in the aggregate for commercial use.

3. Data Disclosure

We may share your information with selected recipients to perform functions required to provide certain Products to you. All such third parties will be contractually bound to protect data in compliance with our Privacy Policy. Funding and transaction information related to your use of certain Products may be recorded on a public block chain. Because block chains are decentralized or third-party networks that are not controlled or operated by Nimbus Core, we are not able to erase, modify, or alter Data from such networks.

4. Data Security

We employ several physical and electronic safeguards to keep your information safe, including encrypted user passwords, two factor authentication on passwords where possible, and securing all connections with industry standard transport layer security. Even with all these precautions, we cannot fully guarantee against the access, disclosure, alteration, or deletion of data through events, including but not limited to hardware or software failure or

unauthorized use. Any information that you provide to us is done so entirely at your own risk.
